

SaaShr.com delivers spotlight presentation on their new HR software at the ITLMA conference in Las Vegas. From job board integration to video resume posting; integrated online background screening to skills testing; from compensation reviews to retirement planning... WEBAPPS HR streamlines self-service and workflow for employees, managers and HR administrators, allowing each to focus on more business-impacting initiatives. Numerous self-service capabilities enable employees to efficiently manage their career, while also providing managers with workflow-driven compensation, job and cost center changes.

### **About SaaShr.com**

SaaShr.com was established in 2002, and has evolved in response to the ever changing needs of both providers and customers of Payroll and Human Resources services.

SaaShr.com's philosophy is one that focuses on software conforming to peoples' needs, rather than people conforming to the limitations of software. In adapting this mindset, they actively engage with and respond to valuable feedback. Together this allows them to collectively bring to market a highly configurable, scalable, and secure suite of workforce management solutions that benefit both you and your customers.
